

Research. Innovation. Scholarship. Education. (RISE)
Health Science Education Innovation (HSEI) Guiding Framework Rubric

Domain	Rubric
Degree of Impact	<p>1 - Does Not Impact Resources, Processes, or Systems: The HSEI intervention <u>did not impact</u> resources, processes, or systems.</p> <p>2 - Impacts Resources, Processes, or Systems Through Adjustments: The HSEI intervention impacted existing resources, processes, or systems through <u>adjustments</u> that introduced small corrections or updates.</p> <p>3 - Impacts Resources, Processes, or Systems Through Modifications: The HSEI intervention impacted existing resources, processes, or systems through <u>modifications</u> that introduced novel applications to different settings and/or populations.</p> <p>4 - Impacts Resources, Processes, or Systems Through Transformations: The HSEI intervention impacted existing resources, processes, or systems - or created impactful new ones - through <u>transformations</u> that introduced radically different methods, technologies, and/or operating changes.</p> <p>NA - Not able to assess/insufficient data</p>
Scale of Implementation	<p>1 - Does Not Scale: The HSEI intervention <u>was not scalable</u> for implementation.</p> <p>2 - Scales within Single Organization and/or Domain: The HSEI intervention was scalable for implementation within a <u>single</u> organization and/or a <u>single</u> health science learner domain.</p> <p>3 - Scales across Multiple Organizations and/or Domains: The HSEI intervention was scalable for implementation across <u>multiple</u> organizations and/or <u>multiple</u> health science learner domains.</p> <p>4 - Scales Nationwide and/or Across the Continuum: The HSEI intervention was scalable for implementation <u>nationwide (or beyond)</u> and/or <u>across</u> health science learner domains.</p> <p>NA- Not able to assess/insufficient data</p>
Translation of Outcomes	<p>1 - Does Not Translate into Outcomes: The HSEI intervention <u>did not translate</u> into any outcomes.</p> <p>2 - Translates into T1 Outcomes: The HSEI intervention translated into improved <u>knowledge, skills, or other attribute (e.g., professionalism) outcomes</u>.</p> <p>3 - Translates into T2 Outcomes: The HSEI intervention translated into improved <u>healthcare or science practice outcomes</u>.</p> <p>4 - Translates into T3 Outcomes: The HSEI intervention translated into improved <u>health or science outcomes</u>.</p> <p>NA - Not able to assess/insufficient data</p>
